

## Specification ER34615+HPC1550-L

Lithium Thionyl Chloride Battery with Hybrid Pulse Capacitor

http://www.akkutronics.com

# 3.6V Li-SOCI<sub>2</sub> Battery with HPC ER34615+HPC1550-L

### FOR HIGH PULSE CURRENT

## ER34615 Electrical characteristics

### **Nominal capacity**

At 23±2°Cdischarge at constant current 2.0mA until 2.0V cut off, Battery capacity depending on temperature and discharge 19000mAh currents and cutoff voltage changes. Nominal voltage

Micro-current discharge platform voltage reference values has to do with battery chemistry system and has nothing to 3.6V do with the battery model.

### Open circuit voltage

The voltage between positive and negative while the current ≥3.65V is open.

### Maximum continuous current

At 23 ± 2 ℃ the battery can discharge at least the max continuous discharge value which rated capacity 50% can permit. 230mA

Maximum pulse discharge current

At 23±2°C, battery discharge duration for 3 seconds and stand 27 seconds, it can discharge at least the max pulse discharge 400mA value which rated capacity 50% can permit.

### Storage condition

Stored the battery under recommends condition to make sure effectively battery's performance, the storage temperature or humidity too high will increase battery's self-discharge rate and reduce battery's storage life.

≤30℃ ≤75%RH

### Operating temperature

Exceed the operating temperature range could lead to battery operating voltage reduction or even a security risk.

-55~+85℃

### **Outline dimension**

Finished Single cells' standard size 34.2×61.5mm Weight Finished Single cells' max weight 108.0g

### Self-discharge rate

Out of the recommended condition, the self-discharge rate 1% may increase.

# Key features

- High Energy Density
- High single cell voltage
- Light weight
  - High security
- Stable operating voltage
- Wide Operating temperature range
- Low Self-discharge rate
- UN38.3 and ROHS Compliance

# Main applications

- Intelligent instruments
- Safe alarm system
- Signal lights and the post indicator transfer
- back-up record power
- Medical equipment
- Wireless and other military equipment
- Active RFID
- Tyre pressure testing system
- GPS system
- GSM system

# **ER34615 Dimension**

# Discharge characteristics at 23±2°C 3.5 3.0 2.5 Discharge characteristics at 23±2°C 2.0 1.5Ω 200mA 107mA 10.5mA 2mA 1.10 Time (hr)

- Do not connect the positive and negative terminals of the battery.
- Do not place battery into fire
- Do not weld directly battery long time.
- Do not recharge battery.
- Do not force-discharge.
- Do not combine batteries in series or parallel by oneself.
- Do not reverse the positive and negative terminals
- Do not swallow.
- Do not discard.
- Stop immediately use it when serious heating or leakage.
- Before using our products, please read the manual Carefully or contact our Technician.
